Seat option	Description	Most often used on
Inflatable lumbar support	 <p>A rubber pouch in the lumbar area of the backrest inflates by a hand-pump adjuster. Provides variability of lumbar support – from a flat neutral support to a very strong firm support when fully inflated.</p>	Spectrum Graphic Arena
Super lumbar	 <p>Extra foam is added to the lumbar area of the backrest, to provide a stronger, more pronounced, lumbar support.</p>	Arena Tag
Reduced lumbar (flat back)	 <p>The foam lumbar support in the chair backrest is reduced to provide a less pronounced, more neutral lumbar support.</p>	Spectrum
Covered backrest outer	 <p>The black plastic outer of the chair backrest is fabric covered – usually to match the seat and back upholstery. Provides a soft aesthetic.</p>	Spectrum Chorus
